

STAR POLYGON WITH WOOL

Analysis of the colours.

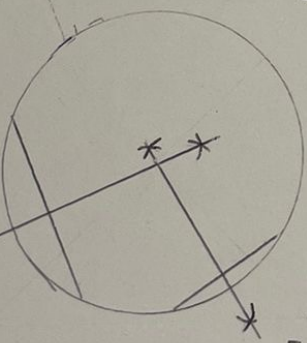

- Light yellow: saturation (4), value (7), primary.
- Mustard yellow: saturation (9), value (9), tertiary.
- Orange: saturation (8), value (8), secondary.
- Carmine red: saturation (8), value (7), primary.
- Bordeaux: saturation (10), value (4), quaternary.
- Dark brown: saturation (9), value (3), tertiary.

Description of the process.

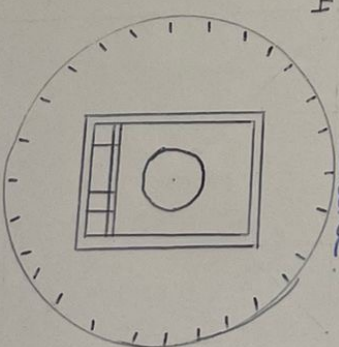

1 Make the shape of the hoop in a paper.

3

3 Make a segment bisector to set the center

4

4 We elongated the activity sides to use them in a proportional size.

Measures and star polygons.

6 star polygons: step 1, step 2, step 3, step 4,

step 5, step and a icosikaidigon (22 sides).

Icosikaidigon: 253 cm.

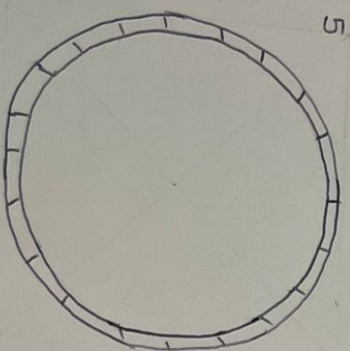

Step 1: 253 cm

Step 2: 382.5 cm

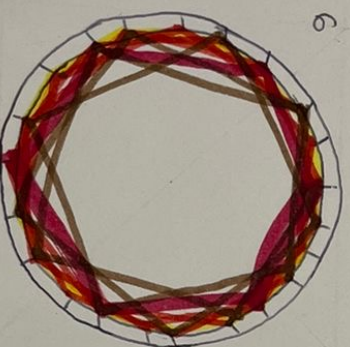

Step 3: 357.5 cm

Step 4: 504.5 cm

Step 5: 514.5 cm

5

6

Make the marks in the hoop and cut them.

We put the wool in the hoop, making polygons.
